Special April Offers

You will be interested in these offers because they give you an opportunity to demonstrate—right in your orchard—and at a saving to you of 50 to 75 per cent—the superior qualities of trees grown the Moncrief Way. We want to prove in your orchard that Moncrief trees bear younger—bear more regular crops—that they produce larger, better colored and finer flavored fruit—that every tree is a profit maker—earns its place in your orchard.

Moncrief Trees are everywhere proving their own best advertisement. In the ideal orchard, every tree is a producer. You are buying earning-power, not wood when you buy these trees. The value of a tree to you is not measured by its size or appearance, but by its ability to produce paying crops.

April is the big planting month of the year, so with it, we bring you these special introductory offers. Read each offer carefully—you will find several that you want. This big reduction in price is made only for April orders. Even if trees are starting in leaf don't think it is too late to plant. Our splendid storage facilities enable us to deliver stock in perfect dormant condition until the middle of May.

Special April Offer on Hottes Elberta

Offer No. 1

The Queen of Yellow Peaches

Offer No. 1

This grand peach was discovered by our Mr. Moncrief in his personal search among several hundred thousand bearing Elberta trees in the million dollar peach district of Colorado. This parent tree was found loaded down, every peach an extra size, rounder than ordinary Elberta, smaller seeds, much sweeter flesh, and in color a rich golden yellow, overlaid with brilliant shades of red.

Yielded \$3.75 Per Tree Third Year—This is the record made by Mr. T. C. Price in his Kansas orchard. He says: "My fifty-seven Hottes Elberta Peach trees, three years set, produced this year one hundred and thirty bushels extra fancy fruit. Two trees which received special attention, produced over four and one-half bushels each. People came to my orchard and paid \$1.50 per bushel for the peaches, while common Elberta were a drug on the market at 75c per bushel."

Every Tree a Producer—No Loafers.—Mr. Price further says: "A remarkable thing about my orchard is that every tree produced a paying crop, not a single loafer among them. The fruit of Hottes colors better and more evenly than the common Elberta, and the meat is firmer and finer grained. They are juicy and tender and every cell is full of sugar."

Bears When Others Fail.—Mr. A. W. Groom of Winfield, Kansas, writes: "I planted one of your Hottes Elberta peaches within 50 feet of an 8-year-old common Elberta belonging to my neighbor. There were only 6 peaches on the 3 common Elberta while my little Hottes, 2-yr., bore 55 peaches."

The Hottes Elberta should be the leading peach in every orchard where peaches can be grown. Its hardiness, earliness of bearing, hugh size, delicious flavor, and unsurpassed color have given it the leading place among profit makers. We want you to see for yourself, how good it really is. So to introduce Hottes Elberta to the largest possible number of fruit-growers this season, we offer a limited number of choice June budded trees at a saving to you of nearly 50 per cent. Don't delay your order because the supply won't last long at these prices.

Start Your Catalpa Grove Now

Offer No. 2

At a Big Saving in Cost

Offer No. 2

Every farm should have its own post and timber supply—an acre or two—perhaps five or twenty. Speciosa Catalpa is the ideal tree for posts or poles. Makes posts in four years—poles in six. Post sound after twenty-five years use. Lumber equal to Oak and Mahogany. C. W. Delker made \$500 an acre in Catalpa farming on his Kansas plantation—and he did it in just eight years.

Hundreds of farmers are making big profits and planting bigger forests. Goldmine for overflow land. Thousands of idle acres can be made to yield a sure and permanent income by Catalpa farming.

You must be sure to get the genuine Speciosa. All other kinds are worthless. Our seed is gathered at great expense from a very limited district in Indiana, the home of the Speciosa Catalpa. To convince every farmer and land owner of the big profits to be made in Catalpa growing, we make this Special Offer for April

OUR OFFER

With every 100 plants ordered, we will send free of charge 100 extra plants, that is, you get 200 plants for the price of 100; 1000 plants for the price of 500, etc. Accept this offer now as the supply will not last long.

Greatest Offer Ever Made on Pedigreed Jonathan

Offer No. 3

The King of Apples

Offer No. 3

You are always safe in planting Jonathan. There never will be an over-production of this great quality apple. Bears young, and will produce big crops for a life time. The Pedigreed Jonathan we are offering you will prove the most marvelous producer of brilliant, dark red apples—delicious in flavor—wonderful in beauty. The mother tree of this strain produced eleven boxes fancy fruit at seven years old. Has borne big crops every year since. You don't have to wait ten years for a crop of apples. These trees will begin bearing the second or third year after planting. Many of them already show well developed fruit buds—a remarkable indication of early bearing. We want every fruit-grower to try this proven prize winner.
